1.0 INTRODUCTION

1.1 DESIGNER NOTES

The Complete Spellbook was written to fulfill a need for information about magic in the realms of *Sharune* (www.sharune.com). Note that this spellbook is not a game in itself. It is an accessory to the online multi-user dungeon.

This manual includes information about the different types of magic and each individual spell in every available spell sphere. It also includes a great deal of information about the roleplaying aspects of the magical system and some information about deities and gods.

We have attempted to provide as much information as possible about most aspects of the magic system. We hope that the players of the online game will find a use for this spellbook to learn and understand how to use their magic and characters in the best possible way.

SPECIAL THANKS

We wish to thank the following individuals for their contributions to this project and the game as a whole where they have spent long hours to help us with testing and ideas:

Ylanea	Tloiaeruo	Tarfas
Luciena	Ygloeria	

We also wish to thank all the players that have been playing the game during the beta testing stages to help us improve it and test the code for the huge amounts of spells available.

1.2 UPDATES

NOTE! You must understand that many things may change after this manual was written and different spells may be gone and new ones may be added. The spellsystem may also have changed and almost anything could be different. We will however try to update this material as often as possible to keep it update with the online game.

This material is intended to be commercially published and distributed to the toy market by regional distributors and sold through the Internet from the Crimson Games website.

Early versions of *The Complete Spellbook* might be available for free download at the game website.

1.3 NOTATION

1.4 SUBMISSIONS

We have included several forms and information about how to create your own spells and spell spheres. It should be possible to create your own classes with their own lists of spells if you take your time. Note however that if you wish to submit your spells, spell spheres or classes to the game you must fill in a submission agreement form. We will reject all ideas from people that have not sent in a submission agreement. The form can be found at:

http://www.sharune.com/building/agreement.html

42.
43. **Group heal.** Heals everyone in the caster's group.
44. -
45. **Resurrection.** This extremely powerful spell can be cast on a corpse to bring the dead person back to life. It will restore most of the lost experience that the owner of the corpse has suffered. The person that is being resurrected must have given consent to the caster for the spell to be successful. When the corpse is being resurrected, the owner of the corpse will crumble to dust and all equipment that is worn or carried in the inventory will fall to the ground in the room where the owner was at the instant the corpse was resurrected. The owner will then be moved into the corpse at the location of the corpse and will get all items that were in the corpse transferred to his inventory.
46. **True healing.** Restores health.
47. **Group full heal.** Heals everyone in the caster's group.
48. **Life giving.** This spell is even more powerful than resurrection as it can be used to transfer the bones of a corpse to the target of the spell. It is cast on a person and if that person has some remains anywhere in the world in form of bones they will be transfer into the target person. All equipment that was in the bones will be transferred to the targets inventory and almost all lost experience stored in the bones will be regained.
49.
50. **Miracle.** Same as the resurrection spell but it is used to resurrect every corpse in the room of the caster.
